18.9 The target score for U14.2s, U14/15s & U15/16s: -

If the match is interrupted after starting and the number of overs in each team's innings needs to be reduced (minimum of 20 overs), a revised target score should be set for the number of overs the team batting second

JUNIOR WINTER CRICKET COMPETITION RULES 2025

will face. This revised target is calculated using the run rate method. The following rules apply to a run rate determined result:

- a) A team's run rate is calculated by dividing its total score by the total number of overs received.
- b) For run rate calculations, each fair delivery counts as one-sixth of an over.
- c) If a team is dismissed before receiving its maximum number of overs, it is considered to have received that maximum number of overs when calculating its run rate.
- d) If the team batting second has a revised target score with fewer overs than the first team, and it reaches this revised score within its reduced number of overs, the match ends even if there are overs remaining. Examples follow:

Example 1: Team A scores 180 runs off 40 overs at a rate of 4.5 runs per over. Due to a rain delay, Team B's overs are reduced from 40 to 25. The revised target score is 25×4.5 , resulting in 113 runs. The match ends as soon as Team B scores 113 runs.

Example 2: Team A is bowled out in 35 overs for 136 runs. Their total score divided by 40 overs results in a run rate of 3.4. After a rain delay, Team B's overs are reduced from 40 to 29. The revised target score is 29×3.4 , equalling 99 runs. The match ends as soon as Team B scores 99 runs.

- e) If the innings of the side batting second is suspended (with at least 20 overs having been bowled) and the match cannot be resumed, the match result is determined by comparing each team's run rate at the suspension time. If the run rates are identical, the match is a Tie; otherwise, the team with the higher run rate wins.
